Date: January 15, 2026

To Whom It May Concern:

RE: Reference for Amani Community Development (NGO/2012/3847)

I am writing to provide a reference for Amani Community Development, with whom USAID has maintained a productive partnership since 2018.

Amani has been a sub-grantee under our Community Health Strengthening Activity (CHSA), receiving a total of \$1.2 million over three years (2021-2024). Throughout this period, they have demonstrated:

1. Strong Financial Management: All financial reports submitted on time with minimal questioned costs (less than 0.5% of total expenditure). Successfully passed annual financial audits with unqualified opinions.
2. Effective Program Delivery: Exceeded program targets by an average of 15%. Their community health worker model has been recognized as a best practice by the Kenyan Ministry of Health.
3. Compliance: Full compliance with USAID regulations including environmental compliance, PSEA requirements, and Trafficking in Persons policy.
4. Reporting Quality: High-quality narrative and financial reports. Responsive to feedback and revision requests.
5. Organizational Capacity: Well-structured governance with an active board. Clear policies and procedures. Strong safeguarding framework.

We would not hesitate to partner with Amani again and consider them a reliable implementing partner in the East African humanitarian and development context.
